

# Hydrocarbon Management Workshop

Thursday, 7<sup>th</sup> June 2018, Scandic Airport Hotel, Stavanger, Norway

## Call for presentations

The Norwegian Society for Oil and Gas measurement (NFOGM) has previously arranged two Hydrocarbon Management Workshops in 2014 and 2016. Both workshops were great successes. Previous presentations are available on [www.nfogm.no](http://www.nfogm.no).

NFOGM is now interested in getting in touch with possible presenters for our upcoming Hydrocarbon Management Workshop in 2018. The time slot for each presentation will be 25 minutes plus 5 minutes for questions and comments. The presentation does not have to be supported by a written paper, a PowerPoint presentation is sufficient.

The Workshop will be a 1-day event to allow participants to travel without overnight stays – this is also convenient for international participants.

As operators, partners, suppliers or customers in each other's fields, developments and operations we all have a shared professional interest in the development of the Hydrocarbon Management discipline.

### The workshop is a great place to:

- Develop a common terminology
- Increase understanding
- Share experience
- Learn from each other
- Highlight challenges within the discipline
- Connect with colleagues from other companies
- Set the future direction of the discipline

### Types of topics covered:

- Design of allocation systems
- Development of allocation standards
- Allocation agreements
- Re-allocation issues
- Various allocation principles - pros and cons
- Metering uncertainty -> field allocation uncertainty -> ownership allocation uncertainty
- Allocation bias
- Risk cost benefit analysis
- Operational experiences and case studies
- Experiences from audits
- Interdisciplinary communication (metering/allocation/economic/commercial/ law)
- Fluid composition

Please consider if you have experiences worth sharing for the development of the Hydrocarbon Management discipline and send a proposed topic or short summary by email to one of the members of the program committee if you are interested in presenting at the workshop.

Deadline for proposals: 2<sup>nd</sup> March 2018.

Bjarne Syre – Faroe Petroleum

Sidsel Corneliussen – AkerBP

Ranveig N. Bjørk – Christian Michelsen Research AS

Harald Denstadt – Statoil

Phillip Stockton – Accord
